

NOAM ACKERMAN

Frontend Developer

About Myself

I'm Noam Ackerman, a frontend developer experienced in React, Next.js, JavaScript, TypeScript, CSS, and more. I'm not just a coder but also a versatile musician and visual artist. **I thrive on challenges, I'm a quick learner, problem solver, and a highly creative individual.** **I value healthy and productive communication.**

Experience

Flare - [Linkedin link](#)

Frontend Engineer

2024 – present

- I collaborate with numerous teams to deliver data-driven features from Figma to production for complex online funnels, marketing acquisition pages and web apps for attorneys and customers.
- I develop with technologies including Next.js, React, TypeScript, Tailwind, Git, Builder.io, UI libraries (Radix and Schacdn), React Testing Library, Jest/Vitest and more.
- I focus on clean, reusable code by creating reusable components, custom hooks and shared utility functions.
- I contributed to frontend guild initiatives, including monorepo convention guidelines and the company's new design system.

PlayTracker - [Website link](#)

Freelancer Developer

2023 – 2024

- I researched gaming platform and games APIs through official docs, third-party libraries, and network sniffing.
- I designed solutions for retrieving player profiles and stats across platforms.
- I developed interactive user interfaces using HTML, CSS, and JavaScript.

Nosto Solutions - [Website link](#)

Frontend Developer

2021 – 2023

- I developed dynamic, responsive merchant interfaces used daily by thousands, using ReactJS, JavaScript, CSS, HTML, and jQuery.
- I owned features from Figma to production, managing Jira tickets and resolving bugs through merchant site investigations.
- I designed UI mockups, wireframes, and improved UX.
- I initiated and guided a new team workflow, created documents to boost productivity, and optimized project management efficiency.
