Summary

I am Noam Ackerman, based back in Israel after living in Berlin for 5 Years.
I've started my coding journey studying at "SheCodes USA" and in my previous job I worked as a Frontend developer at "Nosto Solutions" (using React, HTML, CSS, JavaScript, etc...).
I'm also a musician (singer, songwriter, instrumentalist and music producer) and a visual artist.

I am curious, passionate and diligent, with a strong will power.
I enjoy challenges and solving problems.
I value a healthy, productive and respectful communication.

Skills

• Experienced with various technologies & languages such as **React.js, HTML, CSS, JavaScript, API, Bootstrap, Git, jQuery, Responsive development**

• Experienced with various software tools such as **VS codes, Figma, Office, Slack, Jira, Ableton, Photoshop, Premiere**

• Excellent communication, team player, fast learner, problem solver, highly creative

Experience

-2021 – 2023 – Frontend Developer at "Nosto Solutions": (recommendation can be provided)
Nosto is an Ecommerce Experience Platform — an integrated suite of data-fueled personalization and merchandising solutions.
In my role, I've been creating dynamic and interactive features for costumers and integrating them on their sites, fullfiling hundreds of Jira tickets. I've learned a lot about investigating different environments, creating solutions and optimizing user experience, while leveling up my coding and developing skills.
I often also developed mockups and wireframes for UI while including UX.

- 2021 – 2023 – I've updated my portfolio, highlighting various projects I've built using several technologies and coding languages:

• "Post Your Thought" - A social media platform I've designed and built with React, JSX, JS, CSS (modules) and Firebase integration for Auth, Database and Storage. Authenticated users can set up their profile, post their thoughts, check out other users profile pages and posts, like them and scroll through the homepage feeds.
Public at - post-your-thought.netlify.app
• An Expenses chart app (CRUD) I've built with React and styled with CSS and bootstrap. Where users can add items, filter by years, edit items and delete them. Including a chart diagram and a calculator.
• Weather app React I've built with React, multiple React hooks, JS, JSX and CSS. Including API integration, bootstrap, animated icons and fahrenheit conversion.
• Dictionary-app I've built with React, multiple React hooks, JSX, JS, and CSS. Including multiple API integrations and bootstrap.
• Snake-game I've built with JS, HTML and CSS in a nostalgic 8-bit aesthetics. I've also created original background music and sound effects during the game and integrated it using howler.js audio library.
• A drawing app i've built with HTML, CSS and vanilla JS, where users can draw, adjust colors and brush width, undo last move, and save results

My portfolio is public at - www.noamackerman.com

- 2018 – present – Active Artist and Musician under the name "Noamle"
As "Noamle" I've released 2 albums, 2 EPs, Singles and music videos which I've created and produced, some on my own and some while collaborating as a duo with another artist.
I'm a singer, songwriter, music producer and a visual artist.

Education

• 2023 - Online courses for Advanced React, for TypeScript and for NodeJS.

• 2021 – SheCodes – Front-end, React and responsive web development studies
Intensive studies of all major technologies, languages and softwares related to front-end and web development. During the studies we were faced with multiple exercises, assignments and real-time projects.

• 2018 – 2019 – Music production and sound design studies at "Catalyst music" (formerly "dbs music") .

• Graduated with honor 12 years of formal education and received high school diploma.
