Noam Ackerman

Dear Mr. / Ms.

I am Noam Ackerman, 25 years old. I was born and raised in Israel and currently based in Berlin for the last 3 years.

I've started my journey with coding at "She-Codes" courses. My studies involved learning and applying HTML, CSS, JavaScript, React, JSX, UI and web Development, API integration, bootstrap, vs codes, GitHub, Figma, responsive design and more…

I started coding wanting to expend my horizon due to my deep passion for technology, design, arrangements and logical creative thinking.

When I am not coding, I'm a musician (singer, songwriter, instrumentalist and music producer) and a visual artist since I was young, currently active under the name "Noamle" and skilled in multiple softwares such as Ableton and Photoshop.

I have also studied sound design and music production at "Catalyst Berlin" (formerly "dbs" music).

I am spending a lot of time self-learning things I am passionate about driven by will power, self-discipline and diligence.
I am a hard worker, fast learner and a motivated person who finds pleasure in facing challenges and solving problems.
An healthy, productive and respectful communication is a top value for me in any social or professional interactions.

You can find my CV attached for your reference
I Would be happy to hear from you, to introduce myself in person and to get the opportunity to execute my abilities.

Best regards,

Noam Ackerman

Noam Ackerman

Summary:

I am Noam Ackerman, 25 years old, from Israel and currently based in Berlin.
I've studied coding at "She-Codes" gaining knowledge in all tools related to front-end and web development.
I'm also a musician (singer, songwriter, instrumentalist and music producer) and a visual artist. I have studied sound design and music production at "Catalyst Berlin" (formerly "dbs" music).

I am passionate and diligent. I enjoy challenges and solving problems. I value Healthy, productive and respectful communication.

Experience:

- 2021 – I've designed and built a responsive portfolio with various projects built using several technologies and coding languages

• **Weather app** I've built with vanilla JS, HTML and CSS, with a city search engine and user location identifier. I also used API integration, and bootstrap.
• **To-do list app** I've built with Vanilla JS, HTML and CSS. In this app the user can list their assignments, mark them as completed, filter the completed from the not completed assignments and erase.
• **Snake-game** I've built with JS, HTML and CSS in a nostalgic 8-bit aesthetics. I've also created original background music and sound effects during the game and integrated it using howler.js audio library.
• **Dictionary-app** I've built with React, JSX, JS, HTML, and CSS. Including multiple API integrations, and bootstrap.
• **Weather app React** I've built with React, JSX, JS, HTML, and CSS. Including API integration, bootstrap and animated icons.
• **Random quotes generator and Quotes API** – I've built a mock Quotes API using json-server Package and included 50 quotes so far. Adding to that I've built a random quote generator with HTML, CSS and JS using that API I have built.

- 2018 – present – Active Artist and Musician under the name "Noamle"
As "Noamle" I've released an EP, Singles and music videos which I've created and produced and additional 2 albums, 1 EP, singles and music videos I've released while collaborating as a duo with another artist.
I'm creating lyrics, melodies, music and visual art.

- 2013 - 2015 – Served 2 years at IDF as a singer in a military band
In my service as a solider I've learned valuable principles of discipline, team-work, communication and patience.

Education:

- 2021 – She Codes – Front-end, React and responsive web development studies
Intensive studies of all major technologies, languages and softwares related to front-end and web development. During the studies we were faced with multiple exercises, assignments and real-time projects.

- 2018 – 2019 – Music production and sound design studies at "Catalyst music" (formerly "dbs music")

In this year of studies, I was learning sound design, "Ableton" audio software, synthesis, music production and performance.

- Graduated with honor 12 years of formal education and received high school diploma.

Skills:

Excellent communication - team player - fast learner - problem solver - highly creative.
-Experienced with various software tools such as VS codes, Figma, office, Ableton, Photoshop, premiere
-Experienced with various technologies, languages and technics such as HTML, CSS, JavaScript, React, JSX, API, Bootstrap, GitHub, flexbox, SEO, Responsive Web development, Hosting.

Languages:

Hebrew – Native
English – Fluent
German – Basic level (A2)

Citizenships:

Israeli, Polish (EU passport)
